CONTENTS

Original Contributions

The magnitude of stereopsis in peripheral visual fields
Hiroshi Mochizuki, Nobuyuki Shoji, Eriko Ando, Maiko Otsuka, Kenichiro Takahashi, Tomoya Handa ................................. 1

The knowledge of cervical cancer and screening adherence among nurses at a university-affiliated hospital in Japan
Yae Yoshino, Hiroshi Ohta, Masatoshi Kawashima, Koji Wada, Midori Shimizu,
Hiroko Sakaguchi, Jun Okada, Yoshiharu Aizawa .............................................................................................................. 6

An attempt to detect visual field defects in normal subjects using stereopsis
Hiroshi Mochizuki, Nobuyuki Shoji ........................................................................................................................................ 15

Progestosterone receptor expression correlates with estrogen receptor α but not β and pS2 status in ovarian carcinomas: relation to apoptosis, cell proliferation, p27Kip1 expression, and survival
Sabine Kajita, Erina Suzuki, Makoto Saegusa .............................................................................................................. 22

Usefulness of upstream therapy with renin-angiotensin system inhibitors for prevention of new-onset atrial fibrillation in patients with heart failure
Masami Murakami, Shinichi Niwano, Akira Satoh, Shoko Ishikawa,
Jun Kishihara, Yuu Aoyama, Hiroe Niwano, Tohru Izumi .......................................................................................... 33

Role of thromboxane A2 in enhancement of lung metastasis through the increased adhesion of platelets to tumor cells in mice
Yoshio Matsui, Hideki Amano, Yoshiya Ito, Koji Eshima, Shintaro Kato, Fumihiro Ogawa,
Akira Iyoda, Shuh Narumiya, Yukitoshi Satoh, Masatake Majima ....................................................................................... 39

The impact of urinary cross-linked N-telopeptide of type I collagen in patients with prostate cancer receiving long-term risedronate treatment and androgen-deprivation therapy
Masaomi Ikeda, Takefumi Satoh, Ken-ichi Tabata, Kazumasa Matsumoto,
Hiromichi Ishiyama, Yusuke Inoue, Kazushige Hayakawa, Shiro Baba ................................................................................ 51

Exposure to tributyltin (TBT) via food during developmental stages after weaning, or the exposure via the placenta and their dams’ milk, inhibits body weight gain and behaviors in rats
Ryutaro Ikeuchi, Takamasa Kido, Chiemi Sugaya, Hiroshi Katagiri,
Hisanao Akita, Makoto Saji, Masashi Tsunoda, Yoshiharu Aizawa ....................................................................................... 57

Evaluation of neurotoxicity of artificial dura mater and dura mater containing a high concentration of dibutyltin in rats after intracranial implantation
Masashi Tsunoda, Ryutarou Ikeuchi, Masayoshi Tsuji, Yoko Inoue, Kyoko Ito, Hiroshi Katagiri,
Hisanao Akita, Makoto Saji, Toshiyasu Yuba, Takashi Yamada, Toshie Tsujiya, Yoshiharu Aizawa .................................................. 67

Disease burden estimates for lung cancer in Japan
Hiroshi Chimura, Tomohiro Hirao, Eiichi Seki, Kazuhiro Araki, Toshihiko Satoh ................................................................. 76

Relationship among white matter hyperintensity, arterial stiffness, associated diseases, and lifestyle in late-onset Alzheimer’s disease patients
Hisatoshi Arai, Megumi Takahashi, Motoki Yutani, Taichiro Ikeda, Satoru Oishi, Hitoshi Miyaoka .................................................. 83

Sleep problems among junior high school students with major depressive disorder
Masahide Usami, Arata Oji, Kazuhiko Saito, Kyota Watanabe,
Yoshitaka Iwadare, Masaki Kodaira, Yuuichi Kamei ........................................................................................................ 91

Information for Authors ..................................................................................................................................................... 102
